Software Developer — tools, automation & web

● Available for internships & freelance

Third-year Informatica student at Hogeschool Rotterdam. I build Chrome extensions, automation scripts, internal tools, and small applications. Shipped production work for a Mendix consultancy and an e-commerce business I ran. Started coding to understand sneaker bots; ended up studying it full-time.

SKILLS

Python	Proficient
JavaScript	Proficient
HTML & CSS	Proficient
Mendix	Professional
Git & GitHub	Daily use
REST APIs	Comfortable
SQLite & SQL	Comfortable
Web scraping	Comfortable
Java	Competent
C#	Coursework

LANGUAGES

Dutch	Native
English	Fluent
Turkish	Conversational
Japanese	Beginner

EXPERIENCE

Junior Mendix Developer — Thorix B.V.	2023 – 2024 · Barendrecht, NL
Built Mendix applications for leave management, expense claims, project tracking, time registration, and QR-based reservation systems. Wrote custom microflows, integrated REST APIs, and built dynamic UI components.	
Founder — CandyVillage	2023 – 2024 · Online
Started and ran a Shopify-based store selling halal-certified candy. Sourced inventory, handled bookkeeping in Moneybird, and built an internal Python toolkit that automated most day-to-day operations.	
Founder — ikoProxies	2020 · Online
Sold datacenter proxies to sneaker resellers. Provisioned Linux servers over SSH and configured authenticated proxy endpoints. First exposure to running infrastructure and paying customers.	

EDUCATION

Informatica (HBO) — 3rd year — Hogeschool Rotterdam	2020 – present · Rotterdam, NL
Coursework in OOP, algorithms & data structures, operating systems, concurrency, software quality, functional programming, and modeling & system analysis.	
HAVO diploma — Avicenna College	Rotterdam, NL
Pre-university secondary education.	

SELECTED PROJECTS

ICU Delirium Detection	2026 Capstone
Capstone comparing Random Forest, XGBoost, and LSTM for early delirium detection using MIMIC-IV EHR data. SHAP interpretability, demographic fairness analysis, prediction ensemble. Team of four — targeting scientific publication.	
Python scikit-learn XGBoost PyTorch SHAP pandas	
NYC Taxi Forecasting	2025 Coursework
Team project forecasting NYC green-taxi volumes (2017–2020) using weather and temporal features. Prophet benchmarked against gradient-boosted models with k-fold CV, deployed via Plotly Dash.	
Python Prophet scikit-learn Plotly Dash	
Prayer Times Chrome Extension	2025 Live · github.com/9iiota/prayer-times-namaz-vakitleri-extension
Chrome extension showing daily Islamic prayer times with live badge countdowns and configurable notifications. IslamicFinder API with fallbacks; OSM Nominatim for geolocation. Published to Chrome Web Store.	
JavaScript Chrome API OSM Nominatim Web scraping
