burak-kilic.com

Third-year Informatica student at Rotterdam University of Applied Sciences. I build Chrome extensions, automation scripts, internal tools, and small applications. I've shipped production work for a Mendix consultancy and an e-commerce business I ran. Started coding to understand sneaker bots; ended up studying it full-time.

TECHNICAL SKILLS

Python	Proficient
JavaScript	Proficient
HTML & CSS	Proficient
Mendix	Professional
Git & GitHub	Daily use
REST APIs	Comfortable
SQLite & SQL	Comfortable
Web scraping	Comfortable
Java	Competent
C#	Coursework

LANGUAGES

Dutch	Native
English	Fluent
Turkish	Conversational
Japanese	Beginner

EXPERIENCE

Junior Mendix Developer — Thorix B.V.	2023 – 2024 · Barendrecht, NL
Built Mendix applications for leave management, expense claims, project tracking, time registration, and QR-based reservation systems. Wrote custom microflows, integrated REST APIs, and built dynamic UI components.	
Founder — CandyVillage	2023 – 2024 · Online
Started and ran a Shopify-based store selling halal-certified candy. Sourced inventory, handled bookkeeping in Moneybird, and built the internal Python toolkit that automated most day-to-day operations.	
Founder — ikoProxies	2020 · Online
Sold datacenter proxies to sneaker resellers. Provisioned Linux servers over SSH and configured them to expose authenticated proxy endpoints. First real exposure to running infrastructure and paying customers.	

EDUCATION

Informatica (HBO) — Rotterdam University of Applied Sciences	2020 – present · Rotterdam, NL
3rd year. Coursework in OOP, algorithms & data structures, operating systems, concurrency, software quality, functional programming, and modeling & system analysis.	
HAVO diploma — Avicenna College	Rotterdam, NL
Pre-university secondary education.	

SELECTED PROJECTS

ICU Delirium Detection	2026 · Capstone
Capstone comparing Random Forest, XGBoost, and LSTM for early delirium detection using MIMIC-IV EHR data. Includes SHAP-based interpretability, demographic fairness analysis, and prediction ensemble. Team of four — targeting scientific publication.	
Python scikit-learn XGBoost PyTorch SHAP pandas	
NYC Taxi Forecasting	2025 · Coursework
Team data-science project forecasting NYC green-taxi trip volumes (2017–2020) using weather and temporal features. Prophet benchmarked against gradient-boosted models with k-fold CV, deployed via Plotly Dash.	
Python Prophet scikit-learn Plotly Dash	
Prayer Times Chrome Extension	2025 · Live · GitHub
Chrome extension showing daily Islamic prayer times with live badge countdowns and configurable notifications. IslamicFinder API with Diyanet and IslamVakti fallbacks; OpenStreetMap Nominatim for geolocation. Published to Chrome Web Store.	
JavaScript Chrome API OSM Nominatim Web scraping	

Shopify Ops Toolkit

2024 · [Archived](#)

Internal Python CLI for CandyVillage integrating Shopify, Moneybird, Google Drive/Sheets, and DPD. PyMuPDF for invoice parsing, pytest coverage. Replaced hours of weekly admin work.

[Python](#) [Shopify API](#) [Moneybird API](#) [Google APIs](#)

Quran TikTok Generator

2023 · [Live](#) · [GitHub](#)

Python tool generating short-form videos with Quranic recitation, synchronised Arabic text, and translations. MoviePy for composition, multithreading for parallel generation.

[Python](#) [MoviePy](#) [FuzzyWuzzy](#)

Fit+

2023 · [Coursework](#)

Python gym management system with role-based auth (super admin, system admin, trainer). SQLite with encrypted credentials, login attempt tracking, activity logging, and suspicious-activity detection.

[Python](#) [SQLite](#) [Cryptography](#)

CinemaSharp

2022 · [Coursework](#)

C# console cinema booking system. Customers browse films by genre, pick seats, order snacks, complete bookings. Admins manage films and consumables. Pages & Classes architecture with JSON persistence.
